

TEATRO

Luca Scacchetti

TEATRO living cabinet takes the design language of its collection to new heights. The use of unique angled handles and a miter cut joinery deliver a vivid and interesting visual form to the design. A combination of solid wood and lacquer creates a sturdy and original appearance. The combination of open and closed spaces provides flexible storage capabilities. The TV cabinet unit can have one or two storage levels. The different length of its lacquered strips in the wood frame adds an aesthetic element to the piece's structure. Side cabinets to the left or right can be rearranged as desired.

STRUCTURE

Structure in solid wood, lacquered MDF wood and veneer on particles board

FINISHING

Parts in walnut or stained oak, parts in lacquer

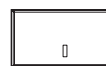

CABINET K25

540*340*1500mm
